## EXPERIENCE

### General Assembly, *Web Dev Immersive Program* (2018)

- Built an original game entitled "Space Dash" which was built using only HTML, CSS, JS and later refactored using React.js
- Created a full screen instagram-like website entitled "StageBright" where users can create an account and post photos - built with Node, Express, and MongoDB (Mongoose) for the server and Handlebars.js for the client and later refactored using Vue.js for the client
- Cooperated with a classmate to make a full-stack application entitled "WOW-ISS" that gives the International Space Station's current location over the earth - made with Node, Express, Mongo (Mongoose) for the server and React.js for the client

### Self Study/Freelance Experience (2016 - 2018)

- Built a website from scratch using HTML, CSS, & JS for professional violinist Chee-Yun
- Assembled many full-stack CRUD apps using Node/ Express
- Learned Git and GitHub as well as working with Linux/Terminal
- Studied the fundamentals of python

### Fairfax County Public Schools, Fairfax VA — Substitute Teacher

JUNE 2015 - AUGUST 2018

Experienced in working with children ranging from K-12, with a focus in teaching mathematics. Job duties included: enforced school rules and regulation to ensure safety and proper conduct, created or followed a lesson plan to direct classroom activities, and assisted students with classwork through explanation and demonstration.

### INOVA Fairfax Hospital, Falls Church VA — *Food Service Operator*

SEPT 2013 - MARCH 2018

Experienced in providing excellent customer service to meet patient needs. Job duties included: used Electronic Health Record Software "Epic Hyperspace" as well as "Dining-on-Call" POS software to conduct transactions with patients, fixed hardware and software issues arising from the computers/printers/software issues/etc., and ensured patients' individualized needs were met in a timely and efficient manner.
